

ANNOUNCEMENT

NEW GHS IT SYSTEM ARRANGEMENTS WHICH ALLOW THE ENROLMENT OF WORKERS FACING EMPLOYMENT DATA ISSUES AND NON-CYPRIOT PENSIONERS

The Health Insurance Organization announces that necessary changes in the GHS IT system have been applied so as to facilitate the enrolment of beneficiaries who **are working but data concerning their employment status appear to present problems**; also, **non-Cypriot pensioners**.

Specifically, this concerns persons who have already added their Alien Registration Certificate (ARC) number in their record in the Social Insurance Services Registry **and**

1. while they are currently employed, their latest recorded employment seems to be terminated
or
2. non-Cypriot pensioners who receive pension from the Social Insurance Services and they have not received a permanent residence permit (MEU3)

Following the changes that have been applied, these persons may now proceed to register to the GHS.
